

MD. YEASIN

Full Stack Developer | React.js | Next.js | .NET Core | Node.js | TypeScript

Rampura, Dhaka, Bangladesh | +880 1624-269321 | +880 1778-185137 | yeasin7y@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer with 2+ years of production experience building ERP and enterprise applications with React.js, .NET Core, Entity Framework Core, and MSSQL. Known for shipping measurable performance and reliability improvements in large-scale systems, alongside independent full-stack work in the MERN ecosystem — including a live cafe POS system now in daily use at Beans & Butter Cafe — bringing range across both .NET and Node backends.

CORE COMPETENCIES

Cross-Stack Development (.NET & Node.js) • ERP Systems • REST API Design • Entity Framework Core • Backend Optimization • Authentication & RBAC • Scalable Architecture • Responsive & Mobile UI

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, React Query, Tailwind CSS
- **Backend (.NET):** C#, .NET Core, ASP.NET Web API, Entity Framework Core
- **Backend (Node.js):** Node.js, Express.js, REST APIs, JWT, RBAC, Socket.io
- **Database:** MSSQL, PostgreSQL, MongoDB, Redis
- **Tools:** Git, GitHub, Postman, Swagger, Azure, CI/CD

EXPERIENCE

Cultive8 Technologies Limited — Mohakhali DOHS, Dhaka, Bangladesh

Software Engineer

Sep 2024 – Dec 2025

- Developed and enhanced ERP modules (Payroll, Plucking) using React.js, .NET Core, and Entity Framework Core.
- Optimized EF Core queries against MSSQL, improving reporting performance by 30%.
- Built and integrated REST APIs (ASP.NET Web API) for frontend-backend communication and business workflows.
- Resolved 45+ production bugs in large-scale systems, cutting user-reported errors by more than 50%.
- Styled interfaces with Tailwind CSS and worked with Redis caching and Azure-hosted infrastructure across the stack.

Associate Software Engineer

Mar 2024 – Aug 2024

- Integrated the React frontend with .NET Core REST APIs to deliver core ERP features, including Report and Attendance workflows.
- Implemented backend authentication, SP, modular routing, and frontend sessionStorage handling to keep the platform stable.

DataXpie — Remote, London

Full Stack Intern

Jun 2023 – Nov 2023

- Built reusable React.js components and integrated REST APIs for reliable user experiences.
- Improved UI structure and state handling, managing code updates through remote Git collaboration.

PROJECTS

ERP_Solutions (Live) — *React.js, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL*

- Co-founded and built a café POS and operations system for Beans & Butter Cafe — live and in daily use — covering order management, reporting, and expense tracking.
- Designed and built REST APIs in Express.js backed by PostgreSQL to handle order, reporting, and expense data end-to-end.
- Rebuilt the New Order, Order History, and Item List screens for mobile, replacing hover-only controls with a tab-switcher pattern to fix touch accessibility.
- Made the dashboard login page fully responsive, fixing scroll and layout issues on small screens.

Multivendor E-commerce (GitHub) — *MERN Stack, Socket.io, Stripe, RBAC*

- Built a multivendor marketplace platform with JWT authentication and role-based access control for buyers, vendors, and admins.
- Implemented real-time order updates with Socket.io and integrated Stripe for end-to-end payment processing.

EDUCATION

B.Sc. in Computer Science & Engineering — **Green University of Bangladesh**

2020 – 2024
