

MD. YEASIN

Full-Stack Software Engineer | React.js | Next.js | .NET Core | Node.js | TypeScript

Rampura, Dhaka, Bangladesh | +880 1624-269321 | +880 1778-185137 | yeasin7y@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Software Engineer with 2+ years of production experience building enterprise ERP systems and business applications using React.js, .NET Core, Entity Framework Core, Node.js, and MSSQL. Delivered measurable improvements including 30% faster reporting and resolution of 45+ production issues. Also designed and deployed Nexus-ERP, a production POS and operations platform used daily by Beans & Butter Cafe, with additional experience building full-stack marketplace systems using the MERN ecosystem.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand, React Query, Tailwind CSS
- **Backend (.NET):** C#, .NET Core, ASP.NET Web API, Entity Framework Core
- **Backend (Node.js):** Node.js, Express.js, REST APIs, JWT, RBAC, Socket.io, Webhooks, Stripe
- **Database:** MSSQL, PostgreSQL, MongoDB, Redis, Prisma
- **Tools:** Git, GitHub, Postman, Swagger, Docker, Azure, CI/CD, Netlify, Render

EXPERIENCE

Cultive8 Technologies Limited — Mohakhali DOHS, Dhaka, Bangladesh

Software Engineer

Sep 2024 – Dec 2025

- Developed and enhanced enterprise ERP modules covering Payroll, Attendance, Employee Management, Plucking, and operational reporting using React.js, .NET Core, EF Core, and MSSQL.
- Optimized EF Core and MSSQL queries, improving reporting performance by 30%.
- Built and integrated ASP.NET Web APIs for data-intensive business workflows and frontend-backend communication.
- Resolved 45+ production issues across frontend, backend, and database layers, reducing user-reported errors by more than 50%.
- Collaborated with product, QA, and business teams to translate operational requirements into production-ready ERP features.

Associate Software Engineer

Mar 2024 – Aug 2024

- Integrated React.js interfaces with .NET Core REST APIs and MSSQL to deliver core ERP reporting and attendance workflows.
- Implemented authentication, MSSQL stored procedures, modular routing, form validation, and session-based frontend workflows.

DataXpie — Remote, London

Full-Stack Developer Intern

Jun 2023 – Nov 2023

- Built reusable React.js components and integrated REST APIs for reliable user experiences.
- Improved UI structure and state handling, managing code updates through remote Git collaboration.

PROJECTS

Nexus-ERP — Beans & Butter (Live) — *React.js, TypeScript, Node.js, Express, PostgreSQL*

- Designed, built, and deployed a production POS and operations platform used by Beans & Butter Cafe for daily orders, payments, expenses, inventory, fund management, and financial reporting.
- Built Express.js and PostgreSQL APIs with Prisma, JWT-based RBAC, payment reconciliation, and Dhaka-timezone business-day reporting across cash, bank, and bKash transactions.
- Redesigned core POS workflows for touch devices and mobile screens based on real staff usage, replacing hover-dependent interactions with touch-first controls.

Bengaldeli — Multivendor Marketplace | Final-Year Capstone (GitHub) — *MERN Stack, Redux, Socket.io, JWT, Webhooks*

- Designed and built a complete multivendor marketplace as my final-year capstone, supporting dedicated customer, vendor, and admin workflows across products, inventory, orders, checkout, and platform administration.
- Implemented JWT-based RBAC, vendor-scoped data access, and real-time customer-vendor communication using Socket.io.
- Integrated Stripe payment processing and validated the complete checkout flow in Stripe test mode using test cards, including webhook-driven payment verification and order-state updates.

EDUCATION

B.Sc. in Computer Science & Engineering — Green University of Bangladesh

2020 – 2024

Higher Secondary Certificate — Kabi Nazrul Govt. College

2017 – 2019
